Description

- DC5?270V/10A (20A) digital adjustable
- 12 Channels
- Suitable for F6, GIS, Vacuum and Oil Circuit Breaker

With experiences of circuit breaker testing, introducing CBT20 intended for circuit breakers testing. Smaller and simpler, CBT20 is equally versatile and gives more attractive price to small power plants and contractors.

CBT20 designed to test circuit breakers having one main contact per Phase. Coil currents are measured automatically and presented together with other readings immediately after testing on the display window or via the built-in printer.
